

# Caution Electricity

Keep your distance

**You enjoy open-air sport  
or leisure activities...**

Your sport or leisure activity can take you dangerously close to a power line or pylon.

If you get too close, you might cause an electrical arc (or arcing), and run the risk of electrocution.

**TAKE CARE AROUND POWER LINES AND  
ELECTRICAL APPARATUS!**

# Look where you're going

## HIGH-RISK ACTIVITIES

- Paragliding
- Ultralight
- Hang-gliding
- Light planes
- Ballooning
- Kite flying
- Sailing and kite-surfing

## RULES TO FOLLOW

- **Ask your club for advice**, it will have all the relevant information.
- **Check the wind**: the risks vary with wind direction, so can change at any time.
- **Check for power lines** when taking off and landing.
- **Think about distances** when preparing your flight plan.
- **Keep good control of your equipment**, especially near power lines or pylons.
- **Never try to recover an object caught** on a power line.
