## ICAROBATIX 2017

The real-life 'quidditch' of the air-sports scene the PARABATIX SKY RACERS are back at the Coupe Icare for the 7th year in a row, for a new and exciting edition of 'ICAROBATIX'.

The world's top pilots have been selected to compete in this spectacular sky race perched high up on the edge of the Rhone valley.

This year new obstacles and race games have been designed to further challenge the pilots and put them to the ultimate test.

Swooping, aerobatics and slaloming between giant pylons during the dynamic speed races are just a handful of the incredible feats performed by the Parabatix squadron and their foot-launched backpack propelled paragliders (AKA Paramotors & Powered Paragliders).

This year we are expecting an impressive qualifying-round and extreme air race between the French riders and the Spanish racers. Several 'wild-card' pilots will also attending from all around the world as they battle their way for the pole position to be announced live after each race.

Make sure you come to watch this amazing aerial discipline live at Saint-Hilaire and Lumbin or online via our website [www.Parabatix.com](http://www.Parabatix.com) and facebook page [www.facebook.com/parabatix](http://www.facebook.com/parabatix)
